

We are learning...

Coppice Year 1 Newsletter

4/2/19

Maths:

- We will be comparing number sentences using the inequality symbols.
- We will be assessing how children can apply what we have learnt about addition and subtraction, independently.
- We will make and represent numbers within 50 in a variety of ways.

English:

- We will be focusing on punctuating sentences using capital letters and full stops. We will be ensuring we know when to finish and start a new sentence. The 'Punctuation Police' will be checking our work makes sense.
- We will design our own 'Monkey See, Monkey Do' innovated story map using the character we have chosen. We will then have a go at writing our innovated story independently!

Topic:

- We will be learning all about our senses and investigating which parts of the body are associated with each sense. We will be going to the Phiz Lab to complete different experiments.

W.O.W word of the week:

We will be sharing new vocabulary with the children that will support our learning in class. Can you use the word at home? We have sent home a template for you to share and display the word at home together.

'Algorithm' - An 'algorithm' is a precise, step-by-step set of instructions used to solve a problem or achieve an objective.

Communication book target cards:

We will begin to assess and update the children's writing and maths targets, before the end of half term. The class teacher may keep the target cards whilst they are updated. Please look out for any comments/next steps that you can support your child with at home. Thank you for your continued support.

Science taste testing:

In Science we are learning about the human body, and our senses. This week we will taste test a variety of fruit. Please make your class teacher aware of any possible allergies.

Mathletics and Spellodrome:

Well done to the children who are still practising their Maths and Spelling online. We have celebration assembly this Friday where we will be able to hand out any recent Silver or Gold Mathletics certificates and 'Golden Bike' Spellodrome certificates.

Learning at home (optional):

Can you draw/make a number bond rainbow? Can you record the number bonds to 20?

We look forward to showing these in class!
