### Work at home...

As we will be introducing 3D shape next week - can you go on a shape hunt around your home? What 'flat' 2D shapes can you see? What are the names and properties? E.g. does it have corners? How many sides does it have? Can you find shapes with straight sides? Do you know names for any 3D 'fat' shapes you see? E.g. a bauble on your Christmas tree is a sphere.

We will be walking to the post box on Friday to post our letters to Santa.
