

YR4 NEWSLETTER

Week beginning 30.4.18

MATHS:

In maths lessons over the next few weeks, children will be learning about money and time. Money is something that can be taught practically and in real life situations, so if you get the opportunity, children may enjoy paying for items in a shop and working out the change.

HOMEWORK:

For this terms optional homework project, we are asking the children to design an instrument they would like to make using recyclable materials. We would like them to bring in any materials, which they think would make a good instrument, on Tuesday 22nd (4B and 4AW) and Thursday 27th (4VW) ready for our DT lesson. This links to our science topic - sound.

READING DIARIES AND TIMES TABLES:

Please ensure that your child is reading for an hour a week (chunked however suits you e.g. 3 x 20minutes or 4 x 15minutes) and that their homework diary is signed, ready to be handed in on Mondays, along with their times table challenge sheets.

With thanks,

Miss Willcox
