

EU arguments

Since the Government was elected there has been much talk over whether or not we should stay or leave the E.U. People say we should go, however others think we should stay. The vote will take place on June 23 2016 .

LEAVE

A fair amount of people think we should leave because the E.U costs a lot of money to be a member of the EU. If we leave people say we will have a lot more control over our borders and we won't have to allow so many migrants into our community and our country wouldn't be as packed. Adding to that, people say that we would do better on our own.

STAY

Many people think we should stay for financial reasons . As well as . people think we should stay because its alot harder to trade . Adding to that the paperwork for going on holiday. Other People Think we should stay because we will do a lot better because if war breaks out and we are not in the EU were going to struggle.

IN CONCLUSION

In conclusion we think that we should leave the E.U because of all of the immigration problems. Adding to that it costs billions of pounds to stay in the E.U. Also we have to let people into our borders as well as , we don't have enough control over our borders. So our conclusion is to leave the E.U. Thank you for reading our E.U debate.
