

SHOULD WE BREXIT ?

A new issue has risen among the politicians in the UK: should Britain be part of the EU? Many people believed that Britain wasn't doing very well in the EU, so the government decided that there should be an election to let the citizens choose. This election will be taking place on the 23th of June later this year.

Reasons to Stay

The main reason why people want to stay in the EU is because if we became bankrupt then our EU companions can help us by providing some money so we could get back on track. Also if a war broke out then we could form a larger army than our enemy. Another reason is that it would be immensely easier to trade goods if we stayed. The final point that the people who want to stay in can give is that if public want start working or move to another country in the EU, then they can move with ease.

Reasons to leave

Many people believe that we should leave because could choose if we wanted to let people into the UK, also we could manage our own wages and money. Another reason is that we wouldn't have to give away money to other struggling countries. The final point is that the laws we have are shared with the EU and people think that we should be free to make our own laws and rules.

Conclusion

Overall, we believe that the UK should not **BREXIT** but there are many people that would disagree with us. This is the reason why the prime minister has decided to have the vote. He personally wants us to stay in

the EU and is trying to persuade everyone else but they have their own opinions and are sticking with them. **WHAT DO YOU THINK?**...
